CAREER OBJECTIVE

Motivated and enthusiastic first-year Computer Science Engineering (AI & ML) student seeking opportunities to apply programming and analytical skills in real-world projects. Passionate about web development and machine learning.

EDUCATION

B.Tech – Computer Science Engineering (AI & ML)
Karnavati University
2024 – Present

TECHNICAL SKILLS

Category	Skills
Programming	C++, Python (basic), JavaScript
Web Development	HTML, CSS
Tools	VS Code, Git, GitHub
Concepts	Data Structures, Machine Learning (basic)

PROJECTS

Portfolio Website

- Developed a personal portfolio website to showcase projects and skills
- Designed responsive UI using HTML and CSS
- Implemented interactivity using JavaScript

Loan Prediction Model

- Built a machine learning model to predict loan approval
- Applied preprocessing, encoding, and classification algorithms
- Evaluated performance using accuracy and metrics

Airbnb Price Prediction Model

- Developed a regression model to estimate Airbnb prices
- Used features such as location, room type, and availability
- Focused on data preprocessing and model evaluation

Student Form Validation System

- Created a form validation system using HTML, CSS, and JavaScript
- Implemented input validation and user-friendly interface

STRENGTHS

- Problem-solving skills
- Quick learner
- Analytical thinking
- Team collaboration

LANGUAGES

- English
- Hindi
